

NATURALVUE® 2.0

WHY NATURALVUE® 2.0?

NATURALVUE® 2.0's global coverage provides a seamless basemap for geospatial and web-based mapping applications, military/defense logistics, GIS backdrops, flight simulation, cartographic mapping and 3-D visualization, and GPS tracking. NATURALVUE® 2.0 is the only global, commercially available, cloud-free, seamless mosaic using current imagery.

NATURALVUE® 2.0 Specifications

Source Imagery:	95% Landsat 8
Image Currency:	predominantly 2014-2016
Effective Spatial Resolution:	~ 10 meters from 15 meter source
Horizontal Accuracy:	+/- 12.6 meters RMSE
Coverage:	global
Datum:	WGS84
Projection:	Unprojected Geographic
Processing:	Cloud elimination, seamless, natural color, special stretch and sharpening
Format:	GeoTIFF and JPEG2000
Compression:	Uncompressed (GeoTIFF) and Compressed (JPEG2000)
Bit Depth:	24 bit (8 bits each R,G,B)
Image Encoding:	Band Interleaved by Pixel (BIP)
